Subject: Retesting Values for market Sample #33

	Tar (mg/cig) Original	Final
1) Alpine KF MSP	15.6	15.7
2) B&H 100 menthol FMSP	15.4	15.8
3) B&H Deluxe Ultralights	4.4	4.7
4) Marlboro Lights KFHP	10.5	10.8
5.) Parliament Lights KFHP	8.4	8.8

Of the 5 brand packings for which retesting was requested 4 went up to make the tar values equivalent for our advertising! THIS IS GREAT.

However the Alpine KF MSP stays at 16 mg as originally reported!
